Pure p_{res} threshold at $p_z = 0$

Honeycomb: 1-rep equivalent
$p^*_{\text{res}} = 0.00281 \pm 1e-05$

Honeycomb: 3-rep majority vote
$p^*_{\text{res}} = 0.00193 \pm 8e-06$

Honeycomb: 5-rep majority vote
$p^*_{\text{res}} = 0.00117 \pm 4e-06$

Hyperbolic Floquet: 1-rep equivalent
$p^*_{\text{res}} = 0.00288 \pm 1e-05$

Hyperbolic Floquet: 3-rep majority vote
$p^*_{\text{res}} = 0.00259 \pm 1e-05$

Hyperbolic Floquet: 5-rep majority vote
$p^*_{\text{res}} = 0.00157 \pm 6e-06$

Logical error rate per observable

p_{res}

measured $p^*_{\text{res}} = 0.00281$
measured $p^*_{\text{res}} = 0.00193$
predicted from 1-rep: $p^*_{\text{res}} = 0.00094$
measured $p^*_{\text{res}} = 0.00117$
predicted from 1-rep: $p^*_{\text{res}} = 0.000564$
measured $p^*_{\text{res}} = 0.00288$
measured $p^*_{\text{res}} = 0.00259$
predicted from 1-rep: $p^*_{\text{res}} = 0.000963$
measured $p^*_{\text{res}} = 0.00157$
predicted from 1-rep: $p^*_{\text{res}} = 0.000578$
